# Brian Kingsbury (he/him)

UX Developer

## Experience

### Senior Designer

InvestCloud                                          March 2021 - June 2022

- Created user flows and new responsive UIs for desktop, tablet, and mobile
- Designed UI mock-ups in Sketch using internal design system
- Created custom branded design systems for client projects
- Designed layouts for print and digital books for clients using Adobe Suite

### Senior UX Developer

Advicent                                          February 2020 - March 2021

- Design and development owner of internal design system
- Added to and maintained Sketch library of design system
- Added and edited code in component library (HTML, SCSS, Angular)
- Maintained thorough documentation of component library with live examples, code snippets, use cases, implementation standards, and versioning
- Helped development teams across different projects, including writing new code, improving UI style, fixing bugs, and performing code reviews
- Performed accessibility tasks such as full audits, code reviews, design reviews, code improvements and logging outstanding issues

### UX Developer

Advicent                                          May 2017 - February 2020

- Expanded component library and refactored from Angular JS to Angular 2+
- Built UIs for new products, created mock-ups and test sites for user testing
- Performed manual accessibility audits on multiple products
- Created accessibility roadmap to improve product compliance over time

### Associate UX Developer

Advicent                                          April 2016 - May 2017

- Developed UIs for multiple development teams across various products
- Created reusable components and styles for multiple development teams
- Conceptualized and built a component library using Angular JS
